

### Issues

- Speeding and aggressive driving on Colorado Avenue from 13th to 14th
- Gaps in the sidewalk network on Blagden Avenue force pedestrians to walk in the street and reduce access to Rock Creek Park
- Pedestrians experience difficulty crossing Blagden Avenue
- High speed turns from 16th to Colorado and Blagden
- Upshur Street bike connection ends at Georgia Avenue; street is narrower west of Georgia than east of it, so extending bike lane would require trade-off (such as a loss of parking)

#### Bicycle Network

- On-Street Bicycle Lanes
- - Shared Streets (Sharrows)

#### Public Comments

- Failure to stop for pedestrians
- Crosswalk Limitation (distance too long, wait times too long)
- Unsafe Condition for Cycling
- Unsafe Condition for Pedestrians
- ▲ Poor Visibility
- Red Light/Stop Sign Running
- Speeding

### Opportunities

#### Blagden and Colorado Avenues

- Pilot a "slow zone" to calm traffic on Blagden
- Create a sidewalk between Allison Street and Mathewson Drive while preserving mature trees adjacent to the curb
- Use bulbouts to slow down speeding right-turning drivers coming from 16th Street
- Add bike facility on Blagden Avenue from 16th into Rock Creek Park (a moveDC recommendation)

#### Upshur Street

- Redesign Georgia/Kansas/Upshur intersection
- Extend a bicycle facility west of Georgia (a moveDC recommendation)
- Extend sidewalks on Upshur and Mathewson to provide connections to Rock Creek Park
